

Cross Flow Ecoplant

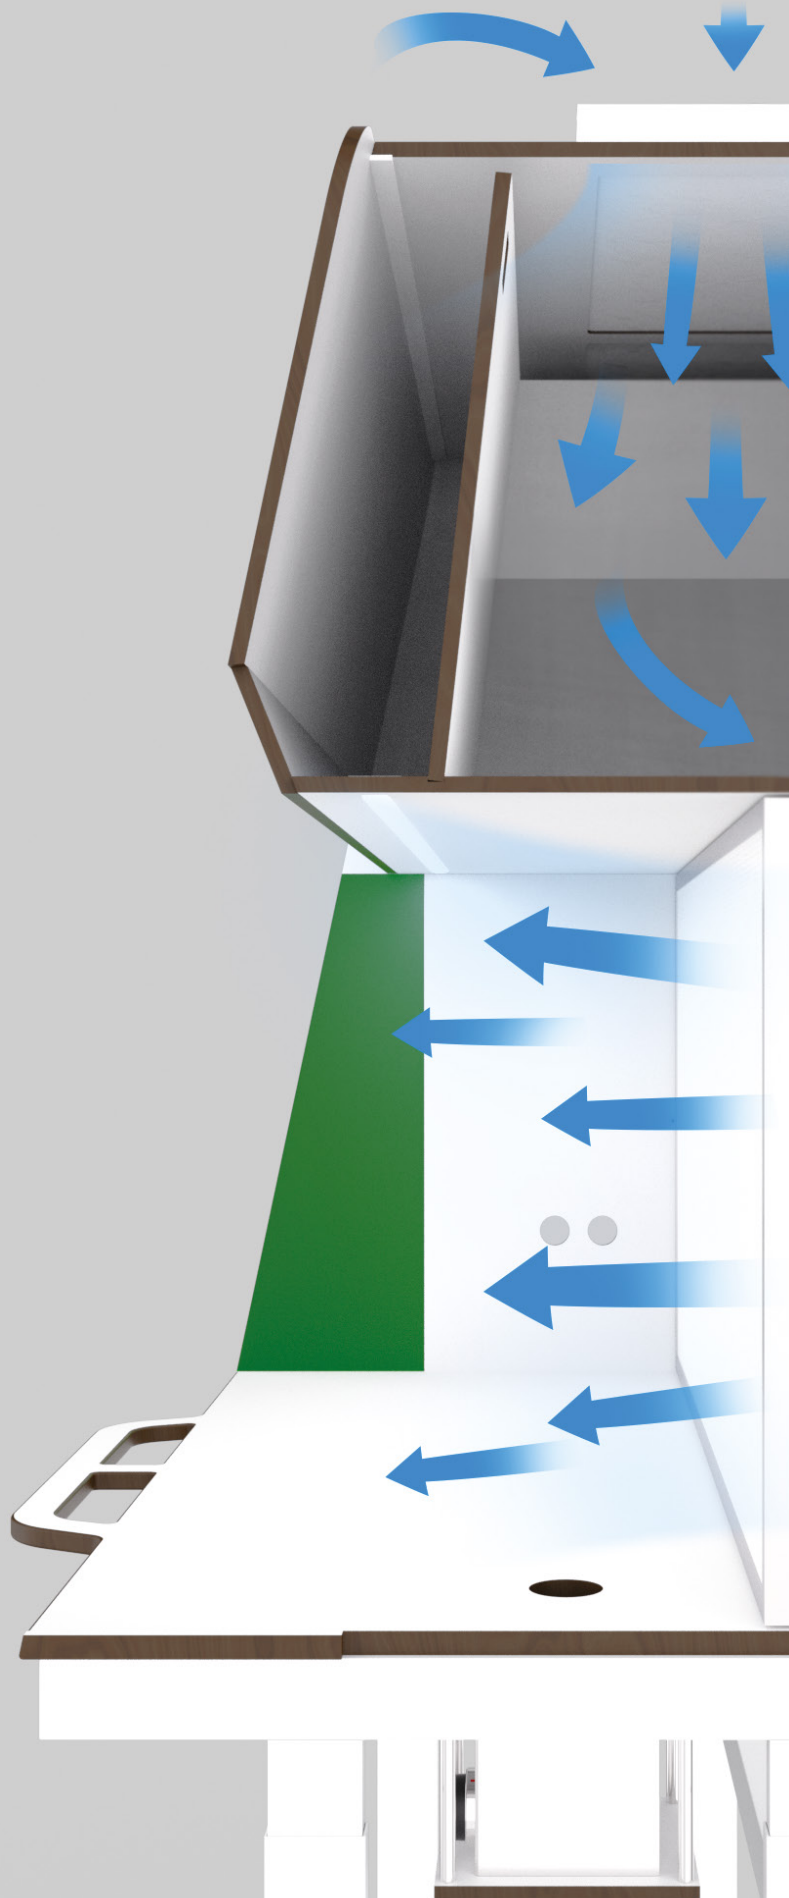

Smart, safe, and sustainable –
specifically for plant science and
laboratories.

Developed in the Netherlands Built for the future

The Cross Flow Ecoplant is specially developed for professionals in plant sciences, cultivation, and breeding. This unit allows you to work clean, efficient, and comfortably — with highest level technology, without unnecessary complexity or cost. A collaboration between Dutch market leaders **Lab Associates** and **Interflow**. Fully developed and produced in the Netherlands.

The new standard in plant cultivation: the Cross Flow Ecoplant

- 100% Dutch design and production
- Efficient, modular, and energy-efficient (up to 40% lower consumption)
- Turbulence-free, with comfort: a workspace that evolves with you
- Affordable alternative to international systems
- Features integrated glass bead sterilizer and ergonomic seat bar

Why choose the Cross Flow Ecoplant?

Functional & user-friendly

- **Integrated glass bead sterilizer**
For sterile scalpels and forceps, keeping the work surface uncluttered.
- **Clear work surface with ergonomic layout**
More space, better working posture, reduced risk of contamination.
- **Integrated seat bar**
Ensures optimal seating posture during extended work periods.
- **HEPA filter protection**
Specially coated grid prevents damage from instruments and glass beads — extending filter life and preventing contamination risks.

Stable and safe airflow

- **Laminar horizontal airflow**
Maintains clean conditions without turbulence or dead spots.
- **Optimal air distribution**
Stable working environment, even during prolonged use.

Modular & future-proof

- **Adaptable to any lab environment**
Choose from basic configurations or high-end expansions.
- **Suitable for multiple sectors**
From plant science to pharmaceuticals and high-tech manufacturing.

Sustainable & energy-efficient

- **Up to 40% lower energy consumption than alternatives**
Less heat, lower costs.
- **Circular design**
Built with a focus on reusability and ease of maintenance.
- **Sustainable choice without compromising quality**
Less material, maximum performance.

Ready for international applications

The Cross Flow Ecoplant will initially launch in the Netherlands, with expansion to Europe, Latin America, Africa, and the Middle East — regions where there is a need for cost effective and high quality laboratory solutions.

Summary: your benefits at a glance

- 100% Dutch design and production
- Specifically developed for plant science
- Advanced functionality without unnecessary frills
- Sustainable, circular, and energy efficient
- Modular: adapts to your evolving needs
- Competitively priced
